SEELINKIN OPS - 10th Gen Intel Core i7

Integrable computing module for interactive whiteboard

Data sheet

Description

Its configuration combines a 10th-generation Intel Core i7 processor, 16 GB of memory, and 512 GB of SSD storage to run educational, corporate, office, and collaboration applications without relying on an external computer.

Designed to integrate with the Seelinkin interactive whiteboard ecosystem and maintain a consistent, professional, and organized user experience.

As a SEELINKIN OPS module, it is engineered for direct integration with SEELINKIN interactive displays, providing full hardware and software interoperability through the standard OPS interface.

Key Indicators

Core i7 10th Gen Intel	**16 GB** RAM	**512 GB** Storage	**Windows 11 Pro** Operating system

Functions and Benefits

- **Integrated computing:** Turns the interactive whiteboard into a full Windows workstation and reduces reliance on external equipment.
- **Professional performance:** The 10th Gen Intel Core i7 platform and 16 GB of RAM facilitate multitasking and smooth application performance.
- **Rapid response:** The 512 GB SSD speeds up system startup, program loading, and access to documents and multimedia content.
- **Manageable environment:** Windows 11 Pro enables you to work with business, educational, and productivity tools within a familiar environment.
- **High-speed network:** RJ45 interface enables stable wired connections; Wi-Fi 6 provides flexibility for modern wireless networks.
- **Neat installation:** The OPS format keeps the computing hardware integrated within the display and helps simplify cabling in the space.

Applications

- Interactive classrooms and computer labs.
- Rooms for meetings, training, and executive presentations.
- Collaboration areas with Windows applications.
- Environments designed to minimize the need for external computers and visible cabling.

Features

Category	Features
Processor	Intel Core i7-10700
RAM	16 GB
Architecture	64-Bit
CPU	8 physical cores / 16 Simultaneous Processing Threads
Storage	512 GB M.2 NVMe SSD, PCIe Gen 3.0
Base Frequency	2.0 GHz
Graphics	Integrated
Video	4K @ 60 Hz
Operating system	Windows 11 Pro, 64-bit, Spanish edition
Licensing	Original OEM license, factory-installed and permanently activated through BIOS/UEFI integration. The license is automatically recognized after operating system reinstallation or system recovery, without requiring temporary licenses, mass activation keys, or third-party activation utilities.

Integration and Compatibility

Environment	Application
Interactive whiteboard	Designed for Seelinkin interactive displays equipped with a compatible OPS slot.
Education and training	Runs learning platforms, browsers, presentations, documents, and multimedia directly from the display.
Meeting rooms	Provides direct access to Windows productivity and video conferencing applications.
Shared environments	Centralizes the computing experience and reduces visible hardware, adapters, and external cable runs.

Operational Value

The solution is designed to simplify day-to-day use, keep the installation visually organized, and make full use of the interactive display.
