GENERAL DESCRIPTION

# Smart interactive whiteboards to transform teaching, meetings, and collaborative work.

Discover SL-WB65E, SL-WB75E, and SL-WB86E series: a family of digital solutions available in 65", 75", and 86" sizes, designed for classrooms, training rooms, offices, and conference spaces.

Thanks to the integrated Android operating system, these smart interactive whiteboards allow for efficient work from the moment they are turned on, without necessarily relying on an external computer. Users can take notes, create presentations, view documents, browse the internet, and share content directly on a large, intuitive touchscreen.

Integrated applications enable the creation of collaborative digital whiteboards and the opening and viewing of files, allowing teachers, students, or work teams to participate simultaneously. The wireless projection feature allows for projecting the screens of compatible devices and dynamically sharing information during classes, meetings, or presentations.

SL-WB E series combines ease of use, connectivity, and collaboration tools into a single solution, making it a versatile choice for modernizing any educational or corporate space.

SL-WB E SERIES

SMART INTERACTIVE WHITEBOARD WITH DLED TECHNOLOGY

# 4K UHD DLED high-definition display

Its 4K UHD resolution of 3.840 × 2.160 pixels reproduces images with exceptional clarity, vivid colors and a high level of detail, for an optimal experience with presentations, educational content, video conferencing, and multimedia material.

Its brightness level of 400 cd/m² allows presentations, text, graphics, and multimedia content to be viewed with great clarity and definition, even in rooms with ambient light, offering a clear and comfortable viewing experience for all users.
